A Disagreement on the meaning of "Sunna."

B Disagreement on the meaning and role of the Caliph.

C Disagreement on how leaders should be elected.

D Conflict over who should be the next Prophet.

CORRECT ANSWER: C

Explanation: The primary cause for the division was a fundamental disagreement over who should succeed Prophet Muhammad after his death. Sunnis believed the Caliph should be chosen through community consensus (election) among the most qualified. Shi'a asserted that leadership should remain within the Prophet's family, specifically through his son-in-law Ali ibn Abi Talib, viewing it as divinely appointed.

WHY THE OTHER OPTIONS ARE WRONG

A: Both branches recognize the importance of the Sunna. The schism was about leadership succession, not the interpretation of traditions.

B: Both groups accepted the need for a Caliph; they simply disagreed on the criteria for eligibility.

D: There was no conflict over who would be the next Prophet; both agree Muhammad was the final Prophet.

A Free trade was confronted with major slave trader states.

B Humanitarian actors condemned slavery as an evil act.

C Seasons of civil unrest began to aggravate the population.

D Industrialization forced them to abandon the use of slave labor.

CORRECT ANSWER: D

Explanation: While humanitarianism (Option B) provided the moral argument, the *functional* reason historians cite for the British shift is that the Industrial Revolution made the slave-based plantation economy inefficient. Industrialization required a mobile, wage-earning working class who could also act as consumers for factory-made goods, which slaves could not do.

WHY THE OTHER OPTIONS ARE WRONG

A: Free trade arguments were actually used by *pro-slavery* advocates who wanted cheap labor; abolitionists had to fight against this economic argument.

B: Humanitarian condemnation was a necessary moral component, but without the economic transition of industrialization, abolition would not have had the state-level support to pass.

A: Diamonds and gold were not discovered in South Africa until the late 1860s, more than 200 years after the Dutch settled the Cape.

B: While the Mediterranean-style climate was conducive to farming, it was a secondary factor to the necessity of a refreshment station.
